

Linde Material Handling
(Ireland) Limited

Linde E20 Zone 2

Zone 2 3G Pyroban Truck

Mint Condition Non Marking rear tyres. With its unique Linde combi steer axle, this popular and well proven series provides the versatility and outstanding manoeuvrability to operate both inside and outside to carry out a hugely variable range of tasks in every conceivable type of industrial application. The combi steer axle enables this four wheeled truck to operate in aisles normally the preserve of three wheelers since the steering angle of this outstanding design concept enables the truck to turn on the spot around its front axle. Another valuable benefit is the tilting cabin which allows wide, easy access from either side to the battery and components making battery changing a simple routine and service intervals are minimised. The spacious, comfortable and superbly functional operator's compartment provides a truly functional interface between operator and truck. This combines with powerful, high torque twin drive motors to deliver impressive cost-effective efficiency and productivity.
